

Informix Performance Tuning Webcast

By Art Kagel

The Webcast will start soon!

Informix Performance Tuning

By Art Kagel

Art Kagel, Principal Consultant of Advanced DataTools Corporation. Art is a member of the IIUG Board of Directors and a recipient of the IIUG Directors Award. Art is a five time recipient of the IBM Information Champion Award

The Webcast will start soon!

Agenda

There are several important aspects to tuning a system that we will cover today:

- Overall Performance
- IO Performance
- Tablespace Performance
- Memory Performance
- Virtual Processor Performance
- Caches

Agenda

There are several important aspects to tuning a system that we will not cover today:

- OS Performance
- Application Performance
- Query Performance
- Schema Design
- Data Distributions
- Storage Layout and Configuration

REVIEW

- Calculate and Review Metrics
- Look at details
- Determine causes
- Formulate fixes
- Test
- Validate

Questions?

Thank you

Advanced Informix Training

Advanced Informix Performance Tuning.

Do you want to learn how to be the ***FASTEST Informix DBA?***

This 4-day course focuses on techniques for optimizing an Informix Database. Labs will demonstrate more than 100% performance improvement. Each student will have a 4-core Linux server with IDS 11.70 or 12.10 and a large dataset for benchmark exercises and labs.

Attend the class in person or online via our Web Training Center.

Both Art Kagel and Lester Knutsen will be teaching the Advanced Classes together. (Cost \$2,000 USD)

- July 15-18, 2013
- October 21-24, 2013

Call 703-256-0267 x101 for more information and to Register or email info@advanceddatatools.com

Advanced DataTools

Building a successful data warehouse requires the commitment of significant time and financial resources. To ensure that this commitment is justified, Advanced DataTools has developed a unique approach based on years of designing and implementing successful programs and applications.

Thank You
