

Your best source for Informix training, whether in our classroom, at your site, or remotely via the Internet!

Our Informix courses were developed and are taught by Advanced DataTools founder Lester Knutsen, who is an Informix Certified Professional and a Certified Technical Trainer. Lester is an experienced consultant with a reputation for providing excellent training based on his extensive and up-to-date working knowledge of Informix. He enjoys teaching, and is frequently asked to develop and conduct additional customized courses onsite for customers. Art Kagel and Lester Knutsen teach the Advanced Informix Performance Tuning Class together.

Schedule of 2017 classes at our Annandale, Virginia site or Online:

- Informix for Database Administrators - February 13-16, 2017
- Advanced Informix Performance Tuning – July 10-13, 2017
- Informix for Database Administrators – September 18-21, 2017

We guarantee to NEVER cancel a course, and will teach a course as long as one student is registered! The course fee is \$2000 per person.

Advanced DataTools' courses are updated and taught using the latest Informix release. All of our Informix classes can be taught on-site or in a virtual environment where you can attend class remotely via the Internet using VoIP and SSH for hands-on-labs.

What our students say about our training...

"The Advanced Performance Tuning class helped me to gain a much deeper understanding of how to analyze and troubleshoot database performance issues. The topics that we covered will also help me to make smart decisions for designing and building new databases and servers. I am very pleased with the amount of information that Lester and Art were able to pack into a 4-day course. Their depth of knowledge and experience make this class worth every penny." - Ryan Hughes, Choice Hotels International

"This was a great class... we will be upgrading from version 10.00 to 11.70... Lester and Art are great instructors, made the class fun, and their depth of experience with Informix and IT in general is very impressive. The upgrade that we will be performing in the coming months was made much easier and it's because of this class." – Bill Chick, SAIC

"I recently had the opportunity to attend (remotely via WebEx) a training course with Lester Knutsen for Informix. This was one of the best investments that we have spent on learning tips to tune and monitor a system. The course was very informative and enlightening. At first I was skeptical of attending a training session remotely, but in the long run it was definitely the best way to have been trained. We were able to immediately make checks, changes, and adjustments to our current infrastructure as the course was being taught. Thanks for all your support and help!" – Eric Urff, Director IT, Daytona State College
